Dear Friends:

Once again the garden was rearranged to allow for the addition of many of the newest iris introductions, making it truly a "connoisseur's garden." Guests from far and near are very much "at home" in our sandy loam. Thousands of seedlings give promise of additional excitement. Come and enjoy them with us. Peak bloom is usually during the last week in May, but you will be welcome at any time.

We wish to take this opportunity to thank our customers for their fine orders, and for their letters of satisfaction and appreciation of extras. We hope that your gardens will display great beauty this season, and that each new variety will meet with your expectations.

Sincerely,

Melba Hamblen

OUR INTRODUCTIONS FOR 1959

- FASHION SHOW** (Hamblen) Early to Late. 36 inches. (Helen McGregor x Hit Parade) x (Mary Randall). Beautifully formed with closed standards and wide, flaring falls. All petals are delightfully ruffled. The color is violet with mauve shadings. An overlay of gold dusting extends from the haft well over the fall petals, creating an illusionary bi-tone effect. A bright orange beard lights up the flower. Substance is fine, branching is exceptional with many well-spaced blossoms on strong stalks. No. H53-18-1. H.C. 1958.\$20.00
- PRETTY CAROL** (Hamblen) Midseason-Late. 36-38 inches. (Pink Tower x Radiation) x (Mary Randall) Lovely rich orchid self with a lighter area in the center of the falls, highlighted by a complementary tangerine beard. Tall, well branched and with heavily substantanced, wide petals. Pretty Carol is, without a doubt, one of the best things we have introduced. In 1956 at the Utah Iris Show she was awarded the "best seedling" trophy and a C. O. C. She also received an H. C. in 1956. No. 53-12.\$25.00

WE ARE HAPPY TO CO-LIST PART OF TELL'S 1959 INTRODUCTIONS

Many are one-year plants, but have made good growth and give promise of bloom.
(Descriptions by Tell.)

- ANEMBO** (Gordon Bootes, Australia) Early-Midseason 38-40 inches tall (Helen McGregor) x (Hit Parade x Pink Formal) The name is Australian Aborigines meaning PEACEFUL. Certainly this huge light yellow self is just that, yet quite overpowering and commanding in its great substance coupled with size. There is a light area in the falls, the only other color save the slightly deeper beard. The petals have great width, the standards are beautifully domed, the falls flaring. Very heavy upright stalks could be lower and better branched. I feel it is a great Iris with marvelous breeding potentialities.\$20.00
- BLUE CREST** (Luzon Crosby, Utah) Early to Late 40 inches tall. (Snow Flurry x Cloud Castle) (Sylvia Murray x Cloud Castle)) x Blue Throat) Lovely, flaring, tailored, white self with a delightful blue beard. The tall stalks are very well branched. With this breeding BLUE CREST should breed superb blues, whites and whites with both self and blue beards. No. C 57-9.\$25.00
- CHIPETA** (Z. G. Benson, Wichita Falls, Texas) Early-Midseason 32 inches. (Cordovan x Argus Pheasant) Here is a true chocolate-brown free of any haft markings. CHIPETA is proving a great breeder for browns, tans and reds. This should be an ideal mate for DARK CHOCOLATE, BINGHAM, SPELLBOUND, BANG, MILLIONAIRE, RUTH COUFFER for coppers and browns and with some of the new reds for good seedlings in this color. A good and easy grower. Plentiful stock.\$10.00
- CREAM CREST** (Tell Muhlestein) Early-Midseason-Late 36 inches. (49-30, sister to Utah Cream, x Yellow Tower) x 49-30 x Spring Sunshine) Very wide cream self, hafts ruffled and smoothly brushed (not veined) lemon-yellow. Guested in three Region 14 gardens this received 15 votes for H.C. award in 1958 under number 55-10.\$25.00
- FIRE CHIEF** (Dr. Frank B. Galyon, Knoxville, Tenn.) Midseason-Late 38 to 46 inches. (Gypsy x Louise Blake) This brilliant, clean variegata has received the highest praise from discriminating A.I.S. judges all over the country. The standards are brilliant yellow, the falls are a rich red self without the border so often associated with this color class. The contrast is striking and harmonious. Branching here was surprisingly good on first year plants, although the branching does vary. FIRE CHIEF should breed excellent variegatas and amoenas. H.C. 1958 \$25.00
- IMMORTAL HOUR** (H. Senor Fothergill, London, England) Early Midseason 36 inches. (Helen McKenzie x Dorothy King) Gorgeous white with a warm beard and wide petals of very heavy substance. Another great iris heavily bred from Purissima blood. The stalk with its fine branching leaves little to be desired Winner of the coveted Romney Towndrow Award in 1956 (for the iris with the best form) and was selected for trial at Wisley the same year. With this breeding IMMORTAL HOUR will be a great parent for blues and whites.\$20.00
- JAN ELIZABETH** (Tell Muhlestein) Early-Midseason ((Salmon Shell) x (D. Hall's 4409, sister to Hit Parade, x Pink Formal)) x (Rosedale) Luscious florescent-like colorings blended in a most charming manner. There are various shades of flamingo pinks, palest orchid-pink and peach set off with a pinkish-cerise beard. The ruffling is so intense it is almost lacing. The standards open and show such pretty parts: lovely laced styles and beautiful beard. Because of the Salmon Shell and Rosedale blood this should become a great breeder for lace. A very limited stock. One to a customer. No. 57-70.\$35.00
- JUNE'S SISTER** (Tell Muhlestein) Early-Midseason-Late 36 inches. (Party Dress x Pink Fulfillment) This is a sister to JUNE MEREDITH, FIRST CURTAIN and LATE APRICOT, and is the parent of GLITTERING AMBER. Breeders have continued to ask for this for breeding purposes. The color of this iris is a blend of apricot. The ruffled standards are open, but retain their position for the life of the flower. The falls are likewise ruffled, are very wide, round and flare almost horizontally. JUNE'S SISTER is proving a fine parent for giving width to its seedlings. Widely distributed under number 51-11E.\$5.00

- LAKE ISABELLA** (Charles Salzer, Lake Isabella, California) Midseason-Late 40 inches. (Pinafore Lass x Kim) This big white plicata nicely marked with violet has the bearing of a stately queen. The markings are even and there is no blaze-mark down the center of the falls that mars so many otherwise lovely plicatas. Since Kim is a descendant of the great breeder Purissima we think this grand plicata holds unlimited possibilities for breeding fine plicatas.\$25.00
- LOVELY DIANA** (Tell Muhlestein) Early-Midseason 36 inches. (Cathedral Bells x Pink Enchantment) Bright Orchid-fuchsia with a colorful-cerise beard. While this is in the color range of such lovely iris as Mary Randall and Pretty Carol it is a little more "red" due to the fuchsia influence. The flowers are bright in the garden and are nicely formed and have good substance. Awarded an H. C. for 1957 under number 56-6 F.\$25.00
- MADemoiselle** (Larry Gaulter, Castro Valley, Calif.) Midseason-Late 38 inches. (Lavenesque x Pathfinder.) A masterpiece of iris sculpture. These blooms look to have been fashioned by some master-maker of ceramics so heavy is the substance and so deftly are the full, wide, falls gently ruffled and held rigidly, but gracefully flared. The falls are so wide at the hafts that they almost touch. The color is lavender-rose and the hafts are smoothly flushed (brushed) sienna. Heavy stalks bear up the very large bloom and many buds to perfection. No. 56-16\$25.00
- MARRIOTT** (Mrs. Parry (Agnes) Marriott, Ogden, Utah) Midseason 30 inches. (White Wedgewood x The Admiral) Flaring pale blue self with a striking blue beard. Very smooth in its finish and coloring it makes a gorgeous border plant. Fertile both ways we feel it has a great breeding potential for those interested in blue-bearded irises\$15.00
- MISS MARTHA** (H. M. McLeod) Very early, intermediate season. 21 inches (Anndelia x True Delight) x Korolkowi Violacea) This lovely little regelia hybrid was named for the daughter of its hybridizer. A most interesting combination of colors. Standards are light raspberry veined deeper raspberry-red. Falls creamy-white changing to light raspberry at tip, and veined deep raspberry-red. This heavy veining forms a signal patch at tip of the dark bronze beard. This could be a most interesting parent for many colors including fine plicatas. Substance only fair.\$10.00
- MIXED EMOTIONS** (Neva Sexton, Wasco, Calif.) Midseason-Late 36 inches (Golden Ruffles x Azure Skies) Looking as though it were carved out of blue-tinted alabaster, and of such heavy substance one would almost think it had been cast of this precious mineral, the flowers have a difficulty folding up when their several days of usefulness are spent. The actual color is pearled white (Blue-tinted white) with chartreuse smoothly brushed on at the hafts. The styles are chartreuse and the stigmatic lips are blue and the chartreuse beard is tipped blue. The very round falls are deftly ruffled near the hafts which are so wide they almost touch one another and the falls flare horizontally yet have a lilt and charm that keep them from appearing too formal. No. N-O-6.\$25.00
- MORNING HAZE*** (Walt Luihn, Hayward, Calif.) Early-Midseason 36 inches. (54-1: Snow Flurry x Prof. Mitchell Blue sdlg.) x Capitola) Large greyed lavender-blue self of perfect form. The beard is blue and some of this same coloring is poured out over the area near the beard giving a suggestion of a "signal patch." The falls and standards measure four inches across. **MOHRNING HAZE** blooms and increases profusely and is perfectly hardy. We do not know the breeding of the Mitchell blue seedling, however, it is likely a Snow Flurry x Chivalry cross. **MOHRNING HAZE** was awarded an H.C. in 1957, and in 1958 won the Gold Cup for Best Seedling in the Sacramento Iris show and received the C.O.C. as well. No. 56-C.\$20.00
- MOHR FUN*** (Jim Gibson, Porterville, Calif.) Early to Midseason 32 to 36 inches. (Nomohr x Capitola) This is a very fascinating hybrid twice descended from the famous Wm. Mohr. As with many Capitola derivatives the midribs of the standards are not quite as strong as we would desire, but we feel this could be one of the great breeders for Aril lovers. Standards are light violet. Falls mauve shaded violet and tan. The beard is tipped violet. Vigorous and a good increaser. A good stock. No. 67-3F10.00
- MR. WONDERFUL** (Luzon Crosby) Early to Late 36 inches. (Tell's 49-31: Hall's 44-09, sister to hit Parade, x Pink Formal) x (Pink Enchantment) This very wide rich pink self including a pink beard created quite a stir at the Utah Iris Society show in 1958 and was there awarded the C.O.C. The hafts are brushed with

- yellow, the only other color in the flower make-up. The extra wide, round falls flare horizontally. We feel it will be a magnificent parent, for not only does it have width and good substance but it has color and a very fine, heavy, stalk. A good and vigorous grower. No. C 56-20.\$20.00
- PARTY PINK*** (Luzon Crosby) Early to Late 38 inches. ((Tell's 49-19 A: ((Elmohr x Golden Eagle) x (Pink Formal)) x Pink Papa)) x (C 52-6: (Sister to Pink Formal x Tell's 48-36 A: Hall Flamingo Pink sdg. x Pink Formal) This large pink has a definite lavender cast which actually makes it much more pink than pinks with the apricot, salmon or peach influence. Beard is the same general color of the flower, but richer. Maker of small rhizomes, but of very fast growth. The slight Elmohr blood makes it fascinating.\$15.00
- PARTY PETTICOATS** (Luzon Crosby) Early to Late 40 inches. (Snow Flurry x Gold Ruffles) x (Little Sweetheart) Ruffles and more ruffles make this medium-sized white flower extraordinarily beautiful. Actually the flowers are a little small for the height of the well-branched stalk, but the charm of the flowers both in the garden and in arrangements is unmatched. We feel PARTY PETTICOATS will make an ideal parent for ruffled flowers, blues, whites, possibly pinks, yellows and creams. No. C 56-45.\$20.00
- SINA MARIE*** (C. J. Paul, Salt Lake City, Utah) Midseason-Late. 38 inches. (Elmohr x Three Oaks) Perhaps this could best be described as a larger, heavier substance and richer Elmohr. The color is mulberry-red yet there seems to be an underglow of warm rosy-tan somewhere in the falls. The styles are those giant-sized styles found in the oncocyclus. Stalks are heavy, foliage healthy. SINA MARIE has that superb substance we hope for in modern iris so they withstand all that mother nature can and does "hand out." For lovers of quality and especially those who like Wm. Mohr derivatives we recommend this grand iris — Mr. Paul's finest achievement. No. 49-29.\$20.00
- SWANDALAY** (Luzon Crosby) Early to Late 40 inches. (Swan Ballet x Mt. Emmons). This wonderful white self with a white lemon-tipped beard was the best of all the gorgeous white seedlings from this cross but was the one with the least increase. Uinta and Lilac Bouquet were introduced and now we are happy to have enough of this to release. The petals are wide and full and the falls flare and ruffle attractively. The name for this iris might have been "WHITE PERFECTION" so very perfect is its form and beauty. The well branched stalks are heavy. Her mother, SWAN BALLET, is very proud, so is "grandpa." No. C 56-12 E\$25.00
- UTAH VALLEY** (Tell Muhlestein) Midseason to Late 40 inches. (C. Rees' Snow Flurry sdg. x Violet Grace) Large violet self but the falls have a wide, round, white area in the center, so it is done in the manner of Pinafore Lass. Not a fast increaser. H. C. 1958. No. WAD 56.\$25.00
- VIOLET LEATHER** (Tell Muhlestein) Midseason to Late 36 inches. ((Pierre Menard) x (Sky Song x Cahokia)) x (Utah Sky) Light violet, near chieory blue. Large flowers with falls that flare horizontally and the substance is so heavy it reminds one of leather. The branching is close and high on heavy stalks. No. 57-111 A. H.C. 1958.\$20.00

BORDER IRIS FOR 1959

- CHOCOLETO** (Mrs. Louis (Crescent) Deru, Ogden, Utah) Early to Late. 22 inches. (Grand Canyon x Tobacco Road) A grand little border iris on well banchcd stalks. No pollen, but could be used as pod parent for more of this type. A very smoothly finished flower with nicely flaring falls, and the size of the flower is in keeping with the stalk. No. T-52-20. H.C. '58.\$10.00
- MOON TALK** (Luzon Crosby) Early to Late. 20 inches. (Flamingo Bay x June Meredith) As pink as either of its two parents with just a touch more violet in the color which makes it all the more a true pink. The beard is similar in tone but deeper. No. C 56-26.\$20.00
- TWO BITS** (Margaret Albright, Salt Lake City, Utah) Early to Midseason. 20 inches. (Sister to YELLOW DRESDEN and YUM YUM) Standards peach-pink, falls blended peach and yellow. A dainty, round and flaring flower as "cute" as its name. H.C. '57.\$10.00

DWARFS FOR 1959

- DROP O' LEMON** (Tell Muhlestein) Very Early 4 inches. (Baria x Little Elsa) Very pale, clean lemon-yellow self including beard. Falls semi-flaring. Was nicknamed "Lemonette" and two or three growers have it under that name. Very limited stock.\$5.00
- LEMON FLARE** (Tell Muhlestein) Early to Midseason of the Dwarf season. 10 inches. (Sister to Little Cottage). (see Tell's catalog.) Actually the color is more creamy-yellow than lemon. The round falls flare horizontally and there are three or four flowers to the stem. There is a bit of yellow texture veining in the falls. A prolific grower and bloomer.\$5.00

THE UNIVERSITY OF CHICAGO
DEPARTMENT OF CHEMISTRY

1954-1955

1. The first part of the report deals with the general properties of the system. It is found that the system is stable and that the reaction is reversible. The equilibrium constant is determined to be 1.5 at 25°C. The reaction is exothermic and the enthalpy change is -10.5 kJ/mol. The activation energy is 15.2 kJ/mol. The reaction is first order with respect to the reactant and zero order with respect to the catalyst. The rate of reaction increases with increasing temperature and decreasing concentration of the reactant. The reaction is inhibited by the presence of water and is accelerated by the presence of acid. The reaction is also accelerated by the presence of a catalyst. The catalyst is found to be a metal complex of the reactant. The reaction is also accelerated by the presence of a catalyst. The catalyst is found to be a metal complex of the reactant.

1959 OFFER

CHOOSE YOUR OWN EXTRAS —

On orders up to \$10.00 select an additional 25% extra iris.

On orders of \$10.00 or more, select an additional 50% extra iris.

NET varieties cannot be selected as extras. To you list of extras please add a few alternates as we are short of stock on some varieties. Special gift iris will be selected from your list of alternates.

VARIETIES with prices not listed are not for sale this year.

TERMS OF SALE

Mail orders — cash please — check or money order. All orders of \$10.00 or more will be prepaid, on smaller orders add 50c for postage.

Local Customers — thirty percent of sale will hold the order and you will be notified by mail when your Iris are ready.

SHIPPING DATES

Iris will be shipped from June 20th to October 1st. Early planting will allow your plants to obtain a full summer's growth. We have found that early planting produces more bloom and larger plants.

Orders will be filled in rotation, however, we will comply with requests for special shipping dates if possible.

GUARANTEE

GUARANTEE — All Iris true to name, free from disease and guaranteed to live and grow. Our Iris are replanted each year—thereby assuring you of healthy, husky rhizomes.

WHOLESALE

WHOLESALE prices quoted to authorized dealers and garden clubs where the order is large enough for us to do so. Send us a list of varieties and amount wanted. We will quote special prices.

JOIN THE AMERICAN IRIS SOCIETY

For additional iris pleasure, we urge you to join the American Iris Society. You will receive four valuable, illustrated Bulletins each year. The Bulletins contain information on iris culture. New varieties are described and their performance in various areas is commented upon. Through the "Robins" you will make many new friends. Dues are only \$5.00, family membership \$6.00.

You may mail your check or money order to The American Iris Society, 2237 Tower Grove Blvd., St. Louis 10, Missouri. New members—make your check to the American Iris Society and include it with your order. We will send it in for you and will allow you to select a \$10.00 iris as a premium.
